

Automated driving is one of the most important drivers of innovation in the automotive industry. At ALP.Lab, the large research institutions and commercial companies of the Styrian automotive cluster have been working for a year to create a comprehensive test offering for autonomous vehicle technology. A central role in this digital toolchain is the development of customers in the focus markets (preliminary: Europe). Be a part of our team and help shape the future of this exciting topic.

We are currently looking for an
